We have used Claude as allowed by the module lecturer, to:

- Understand the layout and functioning of the Life Engine
- Find where features would require changes, so saving and loading would be backwards compatible
- Understand and use JavaScript syntax
- Claude helped with running scripts on the simulation. This helped run the simulation with combinations of conditions
- Adding graphs to track metrics
- Debugging implemented code

ChatGPT:

- Generate concept images for each species for presentation
- Stylize our presentation visuals
